Microbial Biology/Pathogenesis Faculty Positions

The Department is undergoing significant expansion under our new Chair, Dr. Jonathan Karn. At least 6 faculty recruitments are planned over the next few years, with positions available at the Assistant, Associate, Full Professor levels.

We encourage applications from highly qualified individuals with demonstrated experience in:

- Fundamental aspects of Microbial Cell Biology (e.g. cell structure, growth, division, differentiation), and/or
- Molecular Mechanisms of Bacterial or Fungal Pathogenesis (e.g. virulence factors, biofilms, host cell interaction)

Successful candidates will establish a vigorous research program, participate in teaching activities, and interact productively with basic and clinical scientists interested in microbiology and infectious diseases. We offer new laboratory space, generous start-up packages, and a highly interactive environment with exceptional intellectual, infrastructural, and administrative support.

Case School of Medicine, and the Department of Molecular Biology and Microbiology

As the largest biomedical research institution in Ohio, the Case School of Medicine has achieved a national and international reputation as an innovative research center. With 13 basic science and 16 clinical departments, the Case School of Medicine is ranked 10th among the nation’s 125 medical schools in research funding received from the National Institutes of Health.

Under Dr Karn’s leadership the Department has become the focus for studies of molecular virology and bacterial pathogenesis and development within the School of Medicine. The Department is a major participant in the Case Comprehensive Cancer Center, the Center for AIDS Research, and the Center for RNA Molecular Biology. All these activities create a vibrant and highly interactive scientific environment.
Application Instructions

Please prepare an application packet for submission, which contains the following items:

- Letter of application
- Curriculum Vitae
- Brief statement of research goals and accomplishments
- Names and contact information of references

The application packet may be submitted online at:

http://www.case.edu/med/microbio

to the attention of:

Piet de Boer, Ph.D., Chair
Microbial Biology/Pathogenesis Search Committee

Review of applications will commence in January 2005
