Subject: Belize opportunity for primary care residents and faculty, and
To: IHMEC-L <ihmec-l@wwwmac.hsc.unt.edu>
Mime-Version: 1.0

For the first time I will be opening up a few spots in our Belize elective program to primary care residents, senior medical students, and US boarded faculty from outside our institution for the 1999-2000 academic year. The resident and medical student slots are for a calendar month, faculty positions for 10-14 days. Please contact me if you have a good candidate in mind that would enjoy working with Maya Indians in the rainforest of remote southern Belize. Belize is the only English-speaking nation in Central America.

We have been sponsoring this popular and successful rotation for the last five years. After repeated inquiries from IHMEC members, I hope to be able to accomodate a few participants from outside the Medical College of Wisconsin. We have had over 100 participants to date from the Milwaukee environs.

Regards to all,

Jon
