

DR. JORGE GALPERIN

Buenos Aires, Octubre 7, 1998

Mr. Aaron Jacobs

Thank you for your interest in coming to Argentina. The Department of Family Medicine at the Buenos Aires Medical School offers an elective rotation, consisting of a 4 to 8 week period. The following educational activities can be arranged:

- Preceptorship with attending Physicians in a Primare Care specialty (Family Medicine, Pediatrics or Internal Medicine) in their private practice, including home visits.
- Participation in Hospital rounds, conferences, and case discussions.
- Access to medical library and grand rounds.

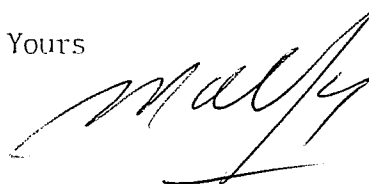

Buenos Aires has a population of 8 million people, a mild climate and is considered a rather safe city.

There are many cultural activities and sport events and transportation is relatively easy. There is no financial aid available for this clerkship, but we would be glad to assist you in locating affordable housing.

Please let me know if you are interested in our program and I will forward an application to you.
