#### Climate and Work Environment
Kathleen Dowdell

The Climate and Work Environment Committee met on November 3, 2010. The purpose of the meeting was to strategize our next steps as a committee in implementing our grass roots effort across campus. An important step we all agreed on was to create an action plan to educate the community about recycling, waste minimization or elimination, and sustainability. Communication is key in all of these areas.

During the Benefits Fair members passed out “It’s Easy to be Green” flyers which contained easy to do actions in departments and at home. This flyer will be linked to Case’s Sustainability Website within the Climate Action Plan as soon as the website goes live.

Committee members are researching how recycling bins are managed as a first step to promote easy recycling practices in each department, center, and lab.

The next meeting will be held on December 1, 2010 in Mather Memorial R201.
