Mission

To create a state-of-the-art building that makes Cleveland as renowned internationally for medical education as it is for clinical care.
Goals

Pedagogy: To exchange ideas in such a way that our students receive the best possible curricula, equipment, technology and learning approaches for the school’s respective tracks.
Goals

Synergy 2: The concentration of such brilliant and dedicated students and faculty in a single space provides incomparable opportunities to share ideas and approaches in formal and informal ways. The greatest innovations are likely to be ones we haven’t even imagined.
Goals

Savings: By integrating both programs in one space, the institutions reduce inefficiencies and preserve resources for investments in high value initiatives rather than duplicative offerings.

Planning Process: Programming & Test Fit

Goals and Objectives

- Describe and define all programs
- Align the key space drivers
- Document functional relationships
- Create detailed space lists
- Study opportunities and constraints
- Validate space and functional program
- Resolve major issues
- Verify program, planning and budget alignment
Committee Expectations

• Report to Central Steering Committee (CSC)
• Meet regularly during programming in preparation for meetings with program architect
• Meet and provide input to program architect
• Review and validate requirements generated throughout programming process
• Advise CSC on committee priorities as required
• Communicate project development to appropriate constituencies
• Consider Adjacencies, Efficiencies, Flexibility and THE FUTURE
