

BIOSIS

Biological Abstracts, a leading source of life sciences information, provides abstracts and bibliographic references to worldwide biological and medical literature. Biological Abstracts contains references to journal items focusing on vital biological and medical research findings, pharmacological studies, and discoveries of new organisms.

Copyright Information Links

The following information should not be considered a substitute for legal advice or for official university policy. It is a compilation of information to assist members of the university community as they apply copyright law in an increasingly digital world.

Copyright classes are held every semester for those who would like to know how copyright affects teaching and research. For more information on classes, check our [Library Copyright Services](#) or contact Copyright, Head of Customer Services, (368-5209).

For more information about the class, if you have a specific question about an item you are placing on Course Reserves, our [Copyright Services](#) staff will be happy to answer your question.

1. Defino-Machin, Mariana, Lum, J. Simon, Breakeur, Dorotte N., Akai, Jun, Stroy, Kate O. Specification and maintenance of the spinal cord stem zone. *Development (Cambridge)* v. 132 no. 19 (OCT 2005) p. 4273-4283 [Abstract]
2. Mills, Peter J. The influence of HDX1 genes and three intercalary signaling pathways on enteric neuroblastoma development. *JNQK Journal of Pediatric Gastroenterology and Nutrition* v. 41 no. Suppl. 1 (SEP 2005) p. S3 [Abstract]
3. Patmest, Lars, Pineault, Nicolas, Agapoulos, Bob, Wan, Adrian, Humphries, Keith R. FLT3 expression is increased by MDS1 and collaborates with NUP98-Hox fusion genes in the induction of acute myeloid leukemia. *Blood* v. 104 no. 11, Part 1 (NOV 16 2004) p. 6994-6995. Annual Meeting of the American Society of Hematology, San Diego, CA, USA, December 04-07, 2004. Sponsor: Amer Soc Hematol. [Abstract]
4. Patmest, Lars, Pineault, Nicolas, Bontas, Patricia, Humphries, Keith R. Redundant leukemogenicity of NUP98-HOX fusion genes in primary murine bone marrow cells correlates with gene expression changes consistent with common key target genes. *Blood* v. 104 no. 11, Part 1 (NOV 16 2004) p. 321A. 46th Annual Meeting of the American Society of Hematology, San Diego, CA, USA, December 04-07, 2004. Sponsor: Amer Soc Hematol. [Abstract]
5. Henschels, Stefan, Schoch, Claudia, Neuberg, Donna S., Leok, A. Thomas. HOXB9 is overexpressed in blast cells from a subset of acute myeloid leukemia patients and supports proliferation of AML cell lines. *Blood* v. 104 no. 11, Part 1 (NOV 16 2004) p. 22A. 46th Annual Meeting of the American Society of Hematology, San Diego, CA, USA, December 04-07, 2004. Sponsor: Amer Soc Hematol. [Abstract]
6. Akin, Z. N., Mariani, A. J. Hox genes and their candidate downstream targets in the developing central nervous system. *Cellular and Molecular Neurobiology* v. 35 no. 3-4 (JUN 2005) p. 697-741 [Abstract]

Plagiarism

Plagiarism.org

Welcome to Plagiarism.org, the online resource for people concerned with the growing problem of Internet plagiarism. This site is designed to provide the latest information on online plagiarism and explain how Turnitin and iThenticate are now being used by educators and content creators all over the world to fight plagiarism and restore integrity to written work.

Turnitin.com is the world's leading online plagiarism prevention, research, and also offers other services directly to students. If you would like to find out more about plagiarism and our proprietary technologies, we invite you to spend some time browsing our site.
