

FINDING HEALTH SCIENCES INFORMATION

Information is everywhere!

- Finding reliable information for educational purposes requires a variety of different skills.
- A researcher must be able to find books, journal articles, meeting reports, personal communications, audiovisual items, etc. - the variety is enormous.
- The information is also available in different formats - print, electronic, audiovisual, etc.
- How do you evaluate the information?
- How do you cite the information you include in your reports?
- Where do you begin?

Define the subject.

- Try a dictionary, or a basic textbook in the subject area.
- To find a book, look in the electronic card catalog of Case Western Reserve University, [EuclidPLUS](#).
- In organizing books and journal articles in the health sciences, the thesaurus of index terms is [MeSH](#) (Medical Subject Headings) from the [U. S. National Library of Medicine](#).
- When you look for a book by [Subject](#), be sure to look at the right side of the page for **MeSH Search**.
- There are online dictionaries and encyclopedias available from [MEDLINEplus](#).

Find books in your subject area.

- Use EuclidPLUS by [MeSH Search](#).
- Use the [MeSH](#) database to find MeSH terms - Headings and Subheadings. The MeSH database can be searched by MeSH term, MeSH Entry Term, Subheading, Publication Type, or words within a MeSH Scope Note.
- In EuclidPLUS, be sure to note the AUTHOR, TITLE, LOCATION, CALL NUMBER and STATUS:

The screenshot shows the EuclidPLUS interface with a search for 'kaplans clinical hypertension'. The results page includes a call number table and a descriptive list. Two callouts highlight key information: one for the author and title, and another for the location, call number, and status.

Call Number Table:

LOCATION	CALL NO.	STATUS
Allen Reserve	WG 340 K17c8 2002	CHECK SHELVES

Descriptive List:

Author	Kaplan, Norman M., 1931-
Title	Kaplan's clinical hypertension / Norman M. Kaplan, with a consultant, William Neal
Imprint	Philadelphia : Lippincott, Williams & Wilkins, c2002
Edition	8th ed
Descript'n	x, 550 p.
Note	Rev. ed.
Includes	
Alt name	Lieberman, Sam

Find journal articles on the topic.

- Journal articles are indexed in databases. There is no all-inclusive database for all journals. You must select a database in your subject area. Sometimes, you may want to search many databases in your subject area.
- Databases available to Case are listed by [subject](#).
- [Health Sciences](#) databases include Ageline, BIOSIS, CINAHL (nursing), Human Nutrition, (OhioLINK) MEDLINE, PsycINFO, PubMed, SCI and others. The databases have online help.
- Not all journal articles are electronically available.
- Not all electronic journal articles are available to Case.
- To determine if a journal is available in print or electronically to Case, check by the [title](#) of the journal in EuclidPLUS. You may also check the journal title abbreviation. If the abbreviation does not display, try the full title.
- Pertinent journal information includes the TITLE, the LOCATION, what the LIBRARY HAS, and where it is available - either stack locations or electronically:

The screenshot shows the EuclidPLUS search interface. At the top, there is a search bar with a dropdown menu set to 'TITLE' and the search term 'acta oncologica'. Below the search bar are several navigation buttons: 'New Search', 'Mark Record For Export', 'MARC Record Display', 'Return to Browse', 'OhioLINK Central', and 'Another Search'. The search results show 'Record 1 of 2' and 'Record: Prev Next'. The main entry for 'Acta oncologica (Stockholm, Sweden)' is displayed with its title and imprint information. A callout box on the right side of the screenshot contains the following text:

Note:
TITLE,
CLICK to go to the electronic version,
LIBRARY HAS indicates which volumes are available in print and electronically.

Below the callout box, the search results are organized into two sections: 'JOURNALS Location' and 'Electronic journal Location'. The 'JOURNALS Location' section lists 'Allen Periodicals' with 'LIB. HAS' information '26- 1987-' and 'Latest Received:' '2004 v.43 no.2'. The 'Electronic journal Location' section lists 'CWRU Electronic Resource' with 'LIB. HAS' information 'v.37- 1998-'.

Find other information on the topic.

- Sometimes you need to search the World Wide Web for other information.
- For government information, try [Firstgov](#) to locate any type of federal information.
- For information about the state of Ohio, try the [State of Ohio](#) web site.
- For the Cleveland Department of [Public Health](#), the web site has many links.
- For disease information from the federal government, try [The Centers for Disease Control and Prevention](#). Included here are electronic publications, data and statistics.
- Sometimes it is necessary to search the web for other information, such as locating a professional organization in your topic area. You will have to use a search engine for this. For health sites, look for the endorsement from the [Health on the Net Foundation](#).

Other Information – including evaluation and citing

- [OhioLINK & ALAO Instruction Clearinghouse](#)
There are links to online tutorials available here.
- [Uniform Requirements for Manuscripts Submitted to Biomedical Journals](#)
This is the Vancouver style. This is a way to *cite* your references in a paper.

Contact Information

- If you need more assistance, please contact [Health Center Reference](#), hclref@case.edu, or by phone at 216-368-3218.
