

Gary Wnek is the Joseph F. Toot, Jr., Professor of Engineering and Professor of Macromolecular Science and Engineering and Professor of Biomedical Engineering (Secondary) at Case Western Reserve University. Gary earned his Ph.D. in Polymer Science and Engineering at the University of Massachusetts in 1980 and his B.S. Degree in Chemical Engineering at Worcester Polytechnic Institute in 1977. He has been a member of the faculty of the Department of Materials Science and Engineering at MIT and the Department of Chemistry at Rensselaer Polytechnic Institute, and was Founding Chair of the Chemical Engineering Department at Virginia Commonwealth University. He joined Case Western Reserve University in 2004 and is currently the Joseph F. Toot, Jr., Professor of Engineering and Professor of Macromolecular Science and Engineering, and holds a secondary appointment as Professor of Biomedical Engineering. Past administrative duties at CWRU include serving as Faculty Director of the Master of Engineering and Management Program and as Associate Dean of Academics in the Case School of Engineering. He was one of the initial conceivers and leaders of think[box], a new campus-wide institute focused on innovation and entrepreneurial thinking. Gary's research interests include polymers for applications in drug delivery and regenerative medicine, synthetic macromolecular constructs that mimic physiological functions (muscle and neurons), bio-mimicking approaches to impart fire resistance to urethane foams and related materials, and multi-functional polymer systems for sensor applications.
