

Fall Semester 2020 – Dining Services

“Safety is our highest priority!”

Welcome to the start of a new year of dining at CWRU!

In response to the safety issues raised in the current environment, we have enacted a number of changes within the Dining Services environment with student safety in mind.

- Meal plans, locations, occupancy & hours have all been adjusted to meet with current safety guidelines.
- New meal plan locations have been added, such as BRB Café near the Quad for breakfast and lunch!
- New employee and student safety policies have been put in place at all university campus locations.
- Menu options have been streamlined and a new reservation app has been added to minimize student wait times.
- Grab & Go and Take-out options have been expanded and new locations added, including at the Dining commons.
- Dining apps have been incorporated into our retail operations to allow customized orders for pick-up.

MEAL PLAN

with Bon Appétit at Case Western Reserve University

BON APPÉTIT IS CURRENTLY OFFERING ALL YOU CARE TO EAT DINING AT LEUTNER COMMONS AND CARLTON COMMONS

Streamlining for a safe dining experience

- Heightened attention exceeding the CDC guidelines for cleaning procedures and sanitation
- Safety ambassador with managers always directing and monitoring student traffic
- Using floor decals for traffic control patterns and queuing
- Decals in aisles between tables (like grocery stores directional aisles)
- Reduced menu offerings
- Reducing the number of tables in the dining room
- Smaller tables one chair per table
- Additional outdoor seating adjacent to dining halls
- Students can return for a second pass
- Stanchions and floor decals to create zones
- One entrance, one exit
- Meals that are safe for students with food allergies or kosher meal requirements (contact Megan.Brzuski@cafebonappetit.com)

Dining at Leutner and Carlton Commons

Both have dining to-go options. The all you care to eat option in the control space can be managed and still provide value to the students. It's an option for students to be present with others and who don't want to eat remotely.

Stations with select menus can be operationally faster and easier to execute. Queuing students will already occur to stations and they can be directed to the menu options they desire.

Students in the control dining room space can queue up at the Ambassador station without leaving the space to select more food and avoid cross traffic.
