Case Western Reserve University, OH

Update to credit analysis

Summary

[Case Western Reserve University's](#) (A1 positive, "CWRU") very good credit quality reflects its significant wealth and large and diverse scope of operations, supported by strong philanthropy and a sizable research enterprise. The scale and diversity of revenues provides protection against weakness in a single revenue stream. Nationally renowned health and science programs continue to drive strong student demand at both the undergraduate and graduate levels, reflected in continued growth in net tuition revenue. Further, strong relationships with the [Cleveland Clinic Health System Oblig. Group](#) (Aa2 stable, "Cleveland Clinic") and [University Hospitals Health System Inc.](#) (A2 positive, "UH") boosts the university's strategic and market position. Offsetting considerations include more constrained liquidity because of higher proportion of permanently restricted assets, moderate operating performance, and a competitive operating environment for students and research awards.

Exhibit 1

CWRU's total cash and investments and operating revenue far exceed the A median

Fiscal 2019 A median data reflect fiscal 2018 results.

Source: Moody's Investors Service

Credit strengths

- » Considerable wealth of nearly \$1.85 billion in total cash and investments in fiscal 2019
- » Strong donor support, averaging \$88 million in gift revenue from fiscal 2017 through fiscal 2019
- » Sizable and diverse scope of operations with a large research profile and total operating revenue of \$926 million
- » Strengthening strategic position with enhanced partnerships, especially with the Cleveland Clinic

Credit challenges

- » Highly competitive student market and significant competition for federal research funding, which are the university's two key revenue streams
- » A large portion of CWRU's wealth permanently restricted, somewhat limiting financial flexibility
- » Improved, but still thin operating performance compared with peers

Rating outlook

The positive outlook reflects the potential for enhanced credit quality should the university's strategic position be further bolstered by the university's recently launched Health Education Campus, strengthening the university's market position and research profile. Further, the positive outlook reflects expectations of continued growth in wealth and scope of operations, driven primarily by strong fundraising and higher net tuition revenue.

Factors that could lead to an upgrade

- » Continued successful operation of the recently launched Health Education Campus
- » Sustainable operating cash flow margins in the low-to-mid double digits
- » Further evidence of strengthened student demand through net tuition revenue growth

Factors that could lead to a downgrade

- » Material decline in available liquid reserves weakening leverage and coverage of expenses
- » Multi-year weakening of operating performance reducing debt service coverage below 1.5x
- » Deterioration of strategic partnerships with the Cleveland Clinic and University Hospitals

Key indicators

Profile

Case Western Reserve University is the largest comprehensive private research university in Ohio, with sizeable operations of over \$925 million and enrollment of over 11,000 FTE students. The university is located in University Circle, a 550-acre concentration of more than 50 educational, medical, cultural, religious, and social service institutions at the eastern edge of Cleveland.

Detailed credit considerations

Market profile: comprehensive research university with strong partnerships and sizable operations

CWRU's excellent strategic position will continue to be anchored by its strong strategic partnerships and prominent graduate reputation, bolstering its research and academic profile nationally. Favorable student demand at both the undergraduate and graduate levels continues, driven by the university's strong reputation in the sciences, technology, engineering, and math (STEM). Since fall 2010, total enrollment is up an impressive 24% to 11,072 full-time equivalent (FTE) student in fall 2019. This growth occurred while many other institutions, particularly in the Midwest, suffered significant declines. Enrollment will likely remain stable, as CWRU has met its undergraduate class size goal. However, its prominent graduate and professional degree programs will remain a solid growth market, particularly given continued high demand for STEM programs.

CWRU bolsters its educational programs and research by collaborating with nearby medical institutions, the Cleveland Clinic and University Hospitals. The relationship with Cleveland Clinic will continue strengthening, as the two agreed on constructing a jointly owned Health Education Campus that opened successfully in summer 2019. The campus includes two buildings that house multiple health science education programs. Both organizations are fundraising jointly for the project, which is estimated at \$515 million, with over \$275 million raised by both to date.

CWRU has a sizable scope of operations and maintains a large research profile with significant federally sponsored research. The university reported total operating revenue of over \$925 million and grants and contracts of \$343 million in fiscal 2019. Overall, revenue comes from a variety of sources, with the largest component, tuition, fees and auxiliaries, representing 42% of total revenue.

Operating performance: surplus operations will continue, but operating cash flow margins will continue lagging peers

CWRU's steady operating performance will continue, but remain slightly below peers. Operating performance improved in fiscal 2019, with an operating cash flow margin of 11.6%, up from 9.8%. Management is budgeting for slightly thinner performance in fiscal 2020, but will continue producing surplus operations. Management's ability to produce continued double-digit operating cash flow margins is a significant credit consideration.

Revenue growth in fiscal 2019 was solid at 5%, materially improved from fiscal 2018 revenue growth of 0.4%. Growth was driven primarily by higher net tuition revenue, up 4%, and increased gifts. Management is budgeting for continued revenue growth in fiscal 2020, driven by increased net tuition revenue, investment income, and the incorporating operations of the Health Education Campus.

Expense growth in fiscal 2019 was a 2.7%, up slightly from fiscal 2018. Management has favorably kept expense growth fairly modest over recent history, with five-year average expense growth of 3.1%. Expense growth will increase in fiscal 2020, primarily due to the incorporation of operations of the Health Education Campus.

Wealth and liquidity: substantial wealth driven by strong fundraising success, although relatively modest unrestricted resources for its size

The university's considerable wealth is a key credit strength with further growth likely over the coming years from excellent fundraising. Total cash and investments in fiscal 2019 total nearly \$1.9 billion, well above similarly rated peers. Three-year average gift revenue (fiscal 2017 through fiscal 2019) is an impressive \$88 million. A recently completed capital campaign was extremely successful, raising over \$1.8 billion, compared to an initial goal of \$1.0 billion. The campaign focused on four areas for fundraising: programmatic support; capital support; faculty support; and student financial aid.

Despite its significant wealth, spendable cash to expenses is weak compared with peers, since a large portion of CWRU's wealth is restricted and research costs elevate overall expenses. Fiscal 2019 spendable cash and investments covered operating expenses 1.2x, below peers of similar credit quality.

To manage the university's large investment portfolio, CWRU has an in-house investment office staffed with five people. The university does not use a consultant to select its managers and the board's investment committee remains active in overseeing the function. At the end of fiscal 2019, the university reported a 6% investment gain, comparable with returns at other similarly-sized endowments.

Liquidity

CWRU's liquidity will remain relatively thin compared to peers, as the university's high proportion of restricted assets and allocation to alternative investments (including hedge funds and private equity) will continue to place limitations on liquidity growth. In fiscal 2019, the university reported available monthly liquidity of \$429 million, translating to 186 days of cash on hand, a slight improvement from the prior fiscal year.

Supplementing internal liquidity are two unsecured external bank lines with two counterparties totaling \$100 million. At the end of fiscal 2019, the university had drawn \$37 million, up from \$36 million at the end of fiscal 2018.

Leverage: affordable and manageable debt burden

Financial leverage will remain manageable despite newly proposed debt as the university continues to amortize outstanding debt and build financial reserves. CWRU has proposed two series of bonds with proceeds going towards partial refunding of Series 2015A bonds, renovating a dining hall, and rehabilitating a performing arts center. Fiscal 2019 spendable cash and investments cover pro forma debt a still solid 2x. Coverage will improve given the university's amortization schedule and fundraising prowess, with \$16 million in principal payments due in fiscal 2020. Improved cash flow materially strengthened debt affordability despite newly proposed debt, with pro forma total debt to cash flow of 4.9x compared with 5.7x in fiscal 2018.

Debt structure

Over recent years, university management has made a concerted effort to revise its debt structure, moving out of privately placed bonds completely earlier in fiscal 2019. Most of the university's debt is fixed rate and amortizing. CWRU does have some bullet payments and one series of bonds in floating rate mode. (Series 2019A bonds are in floating rate mode, though interest rate risk is mitigated by floating receipts on CWRU's outstanding interest rate swaps, resulting in a synthetic fixed rate.) Management does anticipate refinancing bullet payments before maturity. Proposed series 2019B bonds are fixed rate and regularly amortizing. Proposed 2019C bonds are multimodal long-term rate put bonds with a mandatory tender date on December 1, 2026.

Debt-related derivatives

CWRU currently has four floating-to-fixed interest rate swap agreements with a total notional amount of \$71.5 million. At its current rating level, the university posts collateral if the liability to CWRU exceeds \$20 million. As of June 30, 2019 the liability was \$14 million, well below the collateral posting threshold, but up slightly from the fiscal 2018 liability of \$11 million

Pensions and OPEB

The university contributes to both a defined benefit plan (DB) and defined contribution plan (DC). The DB plan stopped being offered to employees hired after July 1, 2015. Total expenses for both plans in fiscal 2019 totaled \$37 million, a manageable 4% of overall expenses. Overall, the liabilities associated with the DB plan surpass assets held for the plan by \$104 million, up from \$90 million in fiscal 2018.

Favorably, the university does not have other post-employment benefits (OPEB) expenses.

Environmental, social, and governance considerations

Like most of the higher education sector, environmental considerations have limited impact on the credit profile of CWRU at this time.

CWRU's ability to attract students from outside of the [State of Ohio](#) (Aa1 stable) and Midwest region mitigates social risk from regional population growth challenges. Students from the State of Ohio makeup approximately 24% of enrolled undergraduate students, down from 28% in fiscal 2015. The university has also maintained relatively flat international enrollment, better than many peers.

CWRU's strong management team has led the university through a period of strengthening reputation and strategic positioning, consistent operating performance, and enhancement of important partnerships. Through successful marketing of its nationally known graduate STEM programs, the CWRU has increased its undergraduate reputation markedly. Though operating performance lags peers, management has consistently achieved fairly steady performance, driven by sound budgeting practices. Additionally, the university's

financial team has made a concerted effort to lower debt structure and liquidity risks through strategic refinancings, lowering overall credit risk.

The university has strengthened its partnership with the Cleveland Clinic through its joint ownership of the Health Education Campus that opened earlier this year. CWRU's ability to manage the campus and its relationship with the Clinic are important to the university's credit current outlook.

Rating methodology and scorecard factors

The Higher Education Methodology includes a scorecard that summarizes the factors that are generally most important to higher education credit profiles. Because the scorecard is a summary and may not include every consideration in the credit analysis for a specific issuer, a scorecard-indicated outcome may or may not match an assigned rating. We assess strategic positioning on a qualitative basis, as described in the methodology.
