

Questions to discuss with your doctor:

- Is this a preventive care or diagnostic care visit?
- Do I need to come back for another visit?
- Based on my age or risk factors, are there any tests or screenings I should have?
- What is my diagnosis?
- How can it be treated, and how soon do I need to make a decision?

- What will happen if I wait to start treating my condition?
- Is there some other way to treat my condition?
- Can I take a generic drug?
- How much does this treatment cost, and is it the most cost-effective?
- Is this the most cost-effective test?
