

# MedPerform Medium Formulary

## January 2020

### What is the Formulary?

The MedImpact MedPerform® formulary is a list of covered drugs selected by physician and pharmacist subject matter experts who collaboratively support MedImpact's Pharmacy and Therapeutics (P&T) Committee. The plan will cover drugs listed in the formulary as long as the drug is indicated for the clinical condition, is prescribed in the appropriate manner, the prescription is filled at a participating network pharmacy, and other plan rules are followed. For more information on how to fill your prescriptions, please review your Evidence of Coverage.

### Can the Formulary (drug list) change?

Drugs may be added or deleted from the formulary during the year. If a drug is removed from the formulary, [or adds prior authorization, quantity limits and/or step therapy restrictions on a drug or moves a drug to a higher cost-sharing tier], the plan will notify affected members of the change before the change becomes effective. If the Food and Drug Administration (FDA) deems a drug on the formulary to be unsafe or the drug's manufacturer removes the drug from the market, the plan will immediately remove the drug from the formulary.

### How does the member use the Formulary?

There are two ways to find a drug within the formulary:

#### 1. Drug Categories

The drugs in this formulary are grouped into categories according to the types of medical conditions that they are used to treat.

#### 2. Alphabetical Listing

If the member is not sure what category to look under, the member should look for the drug in the Index. The Index provides an alphabetical list of all the drugs included in this document. Both brand name drugs and generic drugs are listed in the Index. First, look in the Index and find the drug. Next to the drug, there is a page number where the member can find coverage information. Then turn to the page listed in the Index and find the name of the drug in the first column of the list on that page.

### What are generic drugs?

The plan covers both brand name drugs and generic drugs provided they are prescribed per FDA approved indications and in accordance with the plans benefit design. A generic drug is approved by the FDA as having the same active ingredient as the brand name drug. Generally, generic drugs cost less than brand name drugs.

### Are there any restrictions on coverage of drugs on the formulary?

Some covered drugs may have additional requirements or limits on coverage. These requirements and limits may include:

- **Prior Authorization:** The plan requires members [or their physicians] to get prior authorization for certain drugs. This means that the member will need to get approval before the prescription is filled.
- **Quantity Limits:** For certain drugs, the plan limits the amount of the drug that is covered.
- **Step Therapy:** In some cases, the plan requires a trial of certain clinically appropriate alternative drug(s) before obtaining the prescribed drug.

For certain drugs within the Formulary, a recommended prescribing guideline may apply. These guidelines are noted throughout the Formulary listing using the following symbols:

Symbol	Guideline	Description
AGE	Age Edit	Coverage may depend on member age
PA	Prior Authorization	Requires specific physician request process
QL	Quantity Limit	Coverage may be limited to specific quantities per prescription and/or time period
ST	Step Therapy	Coverage may depend on previous use of another drug
SP	Specialty Drug	Coverage may require dispensing from a specialty pharmacy. Specialty copay/coinsurance may apply depending on benefit.

The member can find out if the drug has any additional requirements or limits by looking within the formulary.

The member can ask the plan to make an exception to these restrictions or limits or for a list of other, similar drugs that may treat the health condition. See the section: “How does a member request an exception to the formulary?”

## Tier Benefit Design

A tier benefit design is where a member is responsible for a portion of the cost of a prescription drug based on the drug’s tier and copayment or coinsurance. Specialty drugs may be covered at a higher copay or coinsurance. Essential Health Benefit/Preventative Care medications, if available on the plan - will be covered without cost sharing (zero copay).

Example of Formulary Tier Design:

- Tier 1: Generic medications
- Tier 2: Preferred brand medications (formulary agents)
- Tier 3: Non-preferred brand medications (non-formulary agents)
- Tier 4: Specialty medications

## Are there general exclusions on the formulary?

Many members have specific benefit inclusions, exclusions, copayments, or a lack of coverage, which are reflected in other Plan Benefit Documents.

The Formulary applies only to outpatient drugs provided to members and does not apply to medications used in inpatient settings. If a member has any specific questions regarding their coverage, they should contact their plan.

**Examples of benefit exclusions:**

- A. Over the Counter (OTC) medications or their equivalents, unless the plan offers coverage of OTC medications.
- B. Drugs specifically listed as not covered.
- C. Anti-Obesity drugs
- D. Medical food/nutritional supplements
- E. Non-Diabetic supplies/Diagnostic supplies/Ostomy supplies/Devices
- F. Disposable Needles & Syringes (Non-Insulin related)
- G. Any drug products used for cosmetic purposes.
- H. Experimental drug products or any drug product used in an experimental manner.
- I. Replacement of lost or stolen medication.
- J. Repackaged drugs and institutional use drugs (e.g. hospital use)
- K. Lifestyle drugs (e.g. sexual dysfunction, infertility)
- L. Non self-administered injectable drug products unless otherwise specified in the Formulary listing.
- M. Foreign sourced drugs or drugs not approved by the United States Food & Drug Administration, except in certain cases of drug shortage, when covered under the plan.

**What if a drug is not on the Formulary?**

If a drug is not included on the formulary, the member should contact the plan. If the member is informed that the plan does not cover the drug, the member has two options:

1. The member can ask the plan for a list of similar drugs that are covered by the plan. When the member receives the list, she/he should show it to the doctor and ask the doctor to prescribe a similar drug that is covered by the plan and is determined by the doctor to be an appropriate alternative drug.
2. The member can ask the plan to make an exception and cover the drug.

**How does a member request an exception to the Formulary?**

The member will need to contact the plan for details on how to file an exception request.

**For more information**

For more detailed information about the prescription drug coverage, please review the Evidence of Coverage or other plan materials.
