Telehealth (Telemedicine)
Telehealth Services

- What is Telehealth?
  Telehealth visits are a virtual way to connect with your healthcare providers. Telehealth visits can be done by computer, tablet or smartphone. Visits include both an audio and visual component, meaning you can see and hear your provider during the visit, just as if you were talking face to face.

- How do I connect for a Telehealth visit?
  Your healthcare provider will let you know what you’ll need to connect for your telehealth visit. It usually involves downloading a mobile app, such as FaceTime or Zoom, or logging in to a website. Some providers may use an online tool that is part of your electronic health record. You may need to complete an online registration process before your visit.
Telehealth – Scheduled Visits

You can obtain the care you need without leaving your home with telehealth services:

- **Scheduled Visits**
  - This is a planned visit with your provider
  - Connect using a computer, tablet or smartphone
  - Can be used for routine care for acute or chronic health conditions
  - Behavioral health visits are included

- **Telepsychiatry**
  - Some psychiatrists also offer telemedicine visits for medication checks and other treatment needs

**Scheduled telehealth visits are covered by your health plan.**
**Ask your provider if they offer telehealth visits.**
Telehealth – On-Demand Visits

If you or a family member needs medical care after hours and you cannot reach your doctor, you can obtain the care you need without leaving your home with on-demand telehealth services:

- **On-demand Visits**
  - 24/7 access to licensed physicians virtually by web or app
  - Use this service after hours or when your physician is not available
  - Receive medical treatment for non-emergency conditions, such as the common cold, respiratory infections and minor burns or lacerations
