

MedPerform Medium Formulary

Administered by MedImpact

October 2018

Foreword

This document represents the efforts of the MedImpact Healthcare Systems Pharmacy and Therapeutics (P&T) and Formulary Committees to provide physicians and pharmacists with a method to evaluate the safety, efficacy, and cost-effectiveness of commercially available drug products. A structured and dynamic approach to the drug selection process is essential to ensure continuing patient access to rational drug therapies.

This is accomplished through the auspices of the MedImpact P&T and Formulary Committees. These committees meet quarterly and more often as warranted to ensure clinical relevancy of the Formulary. To accommodate changes to this document, updates are made accessible as necessary.

Access to the most current version of the MedPerform Medium Formulary can be obtained by visiting www.MedImpact.com.

The MedImpact P&T and Formulary Committees use the following criteria in the evaluation of drug selection for the Marketplace Exchange Standard Formulary:

- Drug safety
- Drug efficacy
- Comparison of relevant therapeutic benefits to current formulary agents of similar use, and reduction of therapeutic duplication wherever possible
- Cost-effectiveness relative to comparable therapies

How to Use the Formulary

The Formulary is a list of medications available to MedImpact members under their pharmacy benefit. All drugs are listed by their generic names and the most common proprietary (branded) name. The Formulary may be accessed by using the index, either by generic or proprietary name and by therapeutic drug category. In situations where an FDA-approved generic equivalent is available, brand names are listed for reference purposes only, and do not denote coverage for the brand, unless specifically noted.

All drugs are listed in each category in alphabetical order by generic name. Where an FDA-approved generic is available for the listed generic name, the generic name is **bolded**.

For certain agents within the Formulary, a recommended prescribing guideline may apply. These are denoted throughout the document using the following symbols:

Symbol	Guideline	Description
AGE	Age Edit	Coverage may depend on patient age
PA	Prior Authorization	Requires specific physician request process
QL	Quantity Limit	Coverage may be limited to specific quantities per prescription and/or time period
ST	Step Therapy	Coverage may depend on previous use of another drug

Please refer to the prescribing guideline appendix within this document for details regarding specific agents.

Benefit Coverage and Limitations

This printed Formulary does not provide information regarding the specific coverage and limitations an individual member may be subject to. Many members have specific benefit inclusions, exclusions, copayments, or a lack of coverage, which are not reflected in the Formulary.

The Formulary applies only to outpatient drugs provided to members and does not apply to medications used in inpatient settings. If a member has any specific questions regarding their coverage, they should contact their Plan Sponsor or MedImpact at (800) 788-2949.

Depending upon a member's specific benefit parameters, the following topics may apply:

1. Generic Substitution

When available, FDA-approved generic drugs are to be used in all situations, regardless of the brand name indicated. The generic names are bolded in the formulary listing wherever an FDA-approved generic drug product is available. Greater economy is realized through the use of

generic equivalents. This policy is not meant to preclude or supplant any state statutes that may exist. All drugs that are or become available generically are subject to review by the MedImpact P&T Committee. MedImpact approves such multi-source drugs for addition to the Maximum Allowable Cost (MAC) list based on the following criteria:

- A multi-source drug product manufactured by at least one (1) nationally marketed company.
- At least one (1) of the generic manufacturer's products must have an "A" rating or the generic product has been determined to be unassociated with efficacy, safety or bioequivalency concerns by the MedImpact P&T Committee.
- Drug product will be approved for generic substitution by the MedImpact P&T Committee.

This list is reviewed and updated periodically based on the clinical literature and pharmacokinetic characteristics of currently available versions of these drug products.

If a member or physician requests a brand name product in lieu of an approved generic, the member, based upon their coverage, will typically be required to pay the difference in cost between the brand and the generic. If a physician determines that there is a documented medical need for the brand equivalent, a request for coverage may be made using the medication request process.

2. Tier Benefit Design

The Formulary may be applied to a tier benefit design, where the member shares the cost of prescription drug therapy based on the drug's tier and copayment or coinsurance. In most instances, generically available drugs will be covered in a separate lower tier (low copay), preferred branded drugs listed on the Formulary will be covered under a higher tier, and branded drugs not on the Formulary will be covered under a separate non-preferred branded drug copay tier. Specialty drugs may be covered at a higher copay or coinsurance. Essential health benefit/preventative medications, if available on your plans formulary (applies to new and non-grandfathered plans), will be covered without cost sharing (zero copay).

Tier Definitions

- Tier 0: EHB Zero Copay/Preventative
- Tier 1: Preferred generic medications (formulary agents)
- Tier 2: Preferred brand medications (formulary agents)
- Tier 3: Non-preferred medications (non-formulary agents)

3. Medication Request Process

Depending upon plan benefit design, a medication request process may apply as follows:

A. Coverage Exceptions

Drugs that are listed in the Formulary with associated Prior Authorization (PA) require evaluation, per MedImpact P&T Committee Prior Authorization guidelines, prior to dispensing at a pharmacy. Each request will be reviewed on an individual patient need basis. If the request does not meet the guidelines established by the P&T Committee, the request will not be approved and alternative therapy may be recommended.

B. Obtaining Coverage

Coverage, questions or information regarding the medication request or formulary process may be obtained by:

1. Faxing a completed **Medication Request Form** to MedImpact at (858) 790-7100.
2. Contacting MedImpact at (800) 788-2949 and providing all necessary information requested. MedImpact will provide an authorization number, specific for the medical need, for all approved requests. Non-approved requests may be appealed. The prescriber must provide information to support the appeal on the basis of medical necessity. Prior Authorization is generally not available for drugs that are specifically excluded by benefit design.

4. General Exclusions

- A. Over the Counter (OTC) medications or their equivalents, unless the individual's pharmacy benefit offers coverage of OTC medications.
- B. Drugs specifically listed as not covered.
- C. Any drug products used for cosmetic purposes.
- D. Experimental drug products or any drug product used in an experimental manner.
- E. Replacement of lost or stolen medication.
- F. Non self-administered injectable drug products unless otherwise specified in the Formulary listing.
- G. Foreign sourced drugs or drugs not approved by the United States Food & Drug Administration, except in certain cases of drug shortage, when allowed under the individual's pharmacy benefit.

Excluded Agents

As new drugs become available, they will be considered for coverage under the MedPerform Formulary. The plan administrator has the right to decide what drugs are covered and to what extent, as well as the right to modify coverage including the exclusion of any prescription drugs. Please note that prescribing guidelines such as Prior Authorization, Step Therapy, Quantity Limit, etc., may still apply to Formulary Therapeutic Alternatives.

The P&T and Formulary Committees recognize that not all medical needs can be met with this document and encourage inquiries about alternative therapies.

5. Pharmacist and Physician Communication

The Formulary is a tool to promote cost-effective prescription drug use. The P&T and Formulary Committees have made every attempt to create a document that meets all therapeutic needs; however, the art of medicine makes this a formidable task. MedImpact welcomes the participation of physicians, pharmacists, and ancillary medical providers, in this dynamic process. Physicians and pharmacists are highly encouraged to direct any suggestions, comments or formulary additions to MedImpact at the following address:

Medication Request Form MedImpact Healthcare systems, Inc.

Instructions:

This form is to be used by participating physicians and providers to obtain coverage for a non-formulary drug for which there is no suitable alternative available. Please complete this form and fax to MedImpact Healthcare Systems, Inc. at (858) 790-7100 or please call (800) 788-2949 with this information. If you have any questions regarding this process, please contact MedImpact's Customer Service at (800) 788-2949.

Review Criteria:

The following guidelines are used in reviewing medication requests:

1. The use of Formulary Drug Products is contraindicated in the patient.
2. The patient has failed an appropriate trial of Formulary or related agents.
3. The choices available in the Formulary are not suited for the present patient care need and the drug selected is required for patient safety.
4. The use of a Formulary Drug Product may provoke an underlying medical condition, which would be detrimental to patient care
