

2014 Faculty Climate Survey Results: Nursing

This report is designed to provide insight into the responses on the 2014 CWRU Faculty Climate Survey. The table includes the total number of respondents, mean, standard deviations, and the % of respondents who indicated a particular response. Whenever possible, CWRU data are compared to AAU peers using independent samples t-tests. As per guidelines of the AAU Data Exchange, comparisons were only made when 5 or more schools reported results. Significance levels less than or equal to .05 are highlighted. A measure of effect size (Cohen's D) is also included. Generally, Cohen's D values less than .2 are considered small, values \sim .5 medium, and values greater than \sim .8 are large. Only tenured/tenure track faculty are included in these analyses.
