An **INSTRUCTOR** position is available in the group headed by Dr. Jonathan Karn, who became Chairman of the Department of Molecular Biology and Microbiology at the Case Western Reserve University School of Medicine in July 2002. The Department has strong ties to the Case Center for AIDS Research, and is currently undergoing a period of rapid expansion.

The work of the group focuses on the control of HIV transcription. Ongoing projects concern biochemical and genetic studies of the mechanisms of action of Tat, HIV repression by chromatin structures, and regulation of promoter clearance by transcription factors.

This position is open to candidates who have at least 3 years of postdoctoral research experience. Experience in the biochemistry of transcription, molecular virology and/or gene expression in mammalian cells is essential. Attractive salary and benefits, and relocation expenses will be provided.

Further details about the Department may be viewed at: [http://www.cwru.edu/med/microbio](http://www.cwru.edu/med/microbio)
