INTENSIVE COURSE IN

Medical Ethics, Boundaries and Professionalism

February 14-15, 2019
September 19-20, 2019

George S. Dively Conference Center,
11240 Bellflower Rd., Cleveland, Ohio

INTENSIVE COURSE IN

Medical Ethics, Boundaries and Professionalism

Who Should Attend?

The Intensive Course in Medical Ethics, Boundaries and Professionalism is designed for physicians in all specialties, physician assistants, nurse practitioners and dentists who wish or need to pursue focused study in areas of applied ethics, including boundary maintenance, and practice management.

Statement of Need

The Doctor-Patient Relationship is a specially privileged relationship in our society. As a result, practitioners are afforded access to information and confidences by patients that are not available to anyone else. Along with this privilege comes a series of professional responsibilities for practitioners. More is expected of practitioners than from most other professionals in our society.

The practice of medicine is governed by several important ethical precepts, including: confidentiality, beneficence, respect for patient autonomy, truth telling and the highest degree of professionalism. Practitioners work within the guidelines of these principles. Yet medical practice can also be challenged by these principles, particularly when two or more of them are in conflict. This expertly taught intensive course – liberally employing case presentations – focuses on applied ethics, from boundary issues to billing practices.

Participant Learning Objectives

After attending this course, participants will be able to:

- Describe the meaning and importance of medical professionalism
- Discuss how conflict of interest may compromise professionalism
- Identify three significant boundary issues and proper limits in relation to each
- Discuss the few exceptions to the principle of confidentiality
- Describe two important ethical issues with respect to operating a practice
- List three elements that help to distinguish between “Usual and Customary” and “Health Care Fraud”
- Describe errors practitioners frequently commit with regard to informed consent
- Explain how autonomy and beneficence can easily come in conflict
- Describe two issues of particular concern when prescribing controlled substances
- Explain how patients behave in two or three typical drug scams and outline appropriate provider countermeasures

Educational Design and Methodology

The course combines lectures, participative discussions, a personal case-based reflective essay, simulations with standardized patients, a pre and post-test, and case studies to create an intensive learning environment for a small group of practitioners.

A G E N D A

Thursday

7:30-8:00 am	Registration and Continental Breakfast
8:00-8:45 am	Introduction and MCQ Test
8:45-9:45 am	Conflict of Interest, Professionalism and the Fiduciary (trust) Relationship, and Case Discussions Stuart Youngner, MD
