

Describing the CTSC in a Grant Application

The Clinical and Translational Science Collaborative (CTSC) of Cleveland, a collaborative among Case Western Reserve University (CWRU) and its affiliated hospital systems, the Cleveland Clinic (CC), MetroHealth (MH), University Hospitals (UH), and the Louis Stokes Veterans Administration Medical Center (VA) is a catalyst for high quality clinical and translational research both locally and nationally. The CTSC provides key services to investigators, trainees, and staff at CWRU and its collaborating institutions to facilitate clinical and translational research. The CTSC's mission is to change the culture and environment of biomedical research, share resources and expertise, and streamline the research process to move translational research from bench to bedside and to the community. The CTSC is supported by the National Institutes of Health (NIH) National Center for Advancing Translational Science (NCATS) through federal grants (UL1TR002548, KL2TR002547, TL1TR002549).
