

A Postdoctoral Scholar position is available to develop molecular imaging agents aimed at detecting tumor cells in the laboratory of Susann Brady-Kalnay. We are recruiting a highly motivated and creative team player to help us develop innovative methods in molecular imaging of cancer. This NIH-funded work is being conducted in the Department of Molecular Biology and Microbiology at Case Western Reserve University in Cleveland, OH.

The project will involve members of the Case Center for Imaging Research. The scientific team includes postdocs, graduate students, and research associates with expertise in physics, chemistry, tumor biology and biomedical engineering. Minimum qualifications include a Ph.D. in chemistry, physics, biology, or biomedical engineering.

The position is open for a maximum 2-3 year Postdoctoral Scholar position. U.S. citizens and permanent residents may be considered for a training grant position.

Application Information: Interested individuals should submit a cover letter, current CV, and names and contact information for 3 referees to: Susann Brady-Kalnay, Ph.D. (susann.brady-kalnay@case.edu). Only complete applications will be considered.

To ensure priority consideration, early application is advised.

In employment, as in education, Case Western Reserve University is committed to Equal Opportunity and Diversity. Women, veterans, members of underrepresented minority groups, and individuals with disabilities are encouraged to apply.

Case Western Reserve University provides reasonable accommodations to applicants with disabilities. Applicants requiring a reasonable accommodation for any part of the application and hiring process should contact the Office for Inclusion, Diversity and Equal Opportunity at 216-368-8877 to request a reasonable accommodation. Determinations as to granting reasonable accommodations for any applicant will be made on a case-by-case basis.
