

# New Undergraduate Neuroscience Course!

## NEUR301/401

### Biological Mechanisms of Brain Disorders

*(3 credits, MWF, 10:35 – 11:25)*

**Enrolling now for Fall 2019**

*This course will introduce students to a broad range of neurological and neuropsychiatric diseases & disorders in order to understand how genetic and environmental perturbations can disrupt normal brain function. We will address underlying biological mechanisms as well as critical knowledge gaps and current efforts to develop treatments.*

***Taught by faculty from the School of Medicine  
(Neurosciences & Neurology) and the College of Arts and Sciences  
(Psychological Sciences)***

For more information please contact the course director:
