

SCHOOL OF MEDICINE

CASE WESTERN RESERVE
UNIVERSITY

The Second Annual Charles L. Hoppel, M.D. Award for Outstanding Contributions in Mitochondrial Research

Award Description

The Award was inaugurated to honor Dr. Hoppel's service to the School of Medicine at Case Western Reserve University, and his outstanding career in mitochondrial biology as a researcher, educator and mentor.

Presentation

The award will be presented annually on the occasion of a special seminar delivered by the award winner at the CWRU School of Medicine in Cleveland, OH. The award consists of:

- An invitation to deliver the Charles L. Hoppel Award Seminar during the fall.
- A \$5,000 honorarium and an engraved plaque
- Complimentary travel expenses for the winner and spouse to attend the Seminar and associated symposium / workshop

Nomination Criteria and Process

- This annual international prize is to be awarded to a scientist who has demonstrated outstanding achievement in research in the broad field of mitochondrial biology. Independence of thought, originality of approach, clarity, and excellence of data presentation are important criteria. Originality, Impact and quality rather than number of contributions are to be emphasized.
- Of equal importance, the recipient will have demonstrated the professional commitment to academic medicine as teacher, mentor and in service to the community exemplified by Charles L. Hoppel, M.D. All scientists are eligible, but preference will be given to physician scientists.
- Selection will be made by the Awards Committee, comprised of accomplished mitochondrial researchers, other accomplished scientists and academic leaders, and benefactors of the Charles L. Hoppel, M.D. Endowment in Mitochondrial Biology.

Nomination Submission

The nominations shall consist of:

1. A brief biographical summary of the candidate, including his/her research and academic credentials and contributions (in PDF and no more than 300 words).
2. A letter of nomination with a summary that describes the importance of the candidate's research work and contributions to academic medicine (in PDF and no more than 1000 words.)
3. The candidate's curriculum vitae and bibliography in PDF.
4. PDF files of up to six published articles, and/or manuscripts that have been accepted for publication, that are representative of the candidate's body of work in mitochondrial biology.

*Note: All pdf files should be compiled into a single composite PDF file and submitted by email to Jason A. Mears, PhD, Chair of the Selection Committee, jam348@case.edu.

Nominations for the 2018 Charles L. Hoppel Award are due by Monday, April 30, 2018.
