

Student Organizations and Life

CampusGroups

CampusGroups is the official campus community platform open to all Case Western Reserve University students. Accessible through its website or via the platform's mobile app, CampusGroups hosts event information, ticket registrations and a community discussion section—not to mention inside tips on where to find free food, fun events and new friends.

Graduate Student Council

Graduate Student Council (GSC) is a university-wide organization open to all CWRU graduate students. GSC's goal is to enrich the lives of the university's graduate students by organizing events, providing health and wellness resources, and facilitating professional opportunities. Activities through GSC include the group's Friday Happy Hours, annual Halloween trip to Cedar Point amusement park, and a variety of events to which you can receive free tickets.

UNIVERSITY

Biomedical Graduate Student Organization

The Biomedical Graduate Student Organization (BGSO) is a club for students who are pursuing master's or doctoral degrees at Case Western Reserve University School of Medicine. The club's aim is to provide students with career and professional resources as well as enriching experiences while they study, train and research at CWRU. BGSO emphasizes peer communication and support with the goal of making your transition to graduate school easier and more supported. General assembly meetings are regularly held for students to express their feelings and concerns and support each other. BGSO serves as a bridge between graduate students and the leadership administration, resolving many issues that impact students' lives.

Minority Graduate Student Organization

The Minority Graduate Student Organization (MGSO) is a student group dedicated to Case Western Reserve University's values of diversity and inclusion. The goal of MGSO is to help minority graduate and postdoctoral students in biomedical fields. MGSO holds monthly meetings where students and training faculty can share their research experiences and future plans.

Making your transition to graduate school easier and more supported
