Why Choose the Cleveland Clinic Lerner College of Medicine?

CCLCM is a distinct program within the CWRU School of Medicine. We train physician investigators who are passionate about scientific inquiry, able to think critically and eager to work collaboratively. Upon completion of the five-year curriculum, our students graduate with an MD degree with Special Qualification in Biomedical Research. They leave CCLCM equipped with the skills to deliver exceptional clinical care, advance research and promote health equity within their communities.

Academics

- **Competency-based** portfolio assessments
- **Master's level** research thesis
- Optional master's level degrees **in addition** to medical degree

Students & Faculty

- **32** student class size
- **Every** student has **both** a physician advisor and a research advisor to help **ensure** success through the program.

Tuition & Financial Aid

- **Full tuition scholarship** for all CCLCM students
- We strive to assure that financial constraints **do not** sway appropriate candidates from following their dreams of becoming a physician investigator.
