

Case Western Reserve University School of Medicine

Genetic Counseling

Prepare to gain hands-on experience with patients and clinicians while you earn your Master of Science in Genetic Counseling at Case Western Reserve University School of Medicine—a tier one medical school for research.

Benefit from a Collaborative Curriculum

In CWRU's two-year program, you'll put coursework into practice, exploring gene expression and development as well as the ethical, legal and social issues that arise in clinical genetics.

In year one, you will:

- Develop an understanding of clinical and molecular genetics,
- Learn to work in an interprofessional setting, and
- Complete community-based projects.

In year two, you will gain experience through:

- Three eight-week fieldwork rotations,
- Two elective four-week rotations
- A two-week lab rotation, and
- A six-week summer immersive fieldwork rotation.

Why CWRU?

At CWRU, we're driven to educate and make an impact in our community through research, innovation and collaboration. We pride ourselves on having not just one, but five “campuses” through our partnerships with local, world-class hospital systems: Cleveland Clinic, University Hospitals, MetroHealth Systems and Louis Stokes Cleveland VA Medical Center.

As a School of Medicine student, you will gain firsthand experience in clinical and research settings as you build a network for your future career.

And, you'll join a culture of innovation. Our campus has been home to numerous medical advances, from the first CPR course to the creation of the first artificial chromosome.

Application Requirements

- Online application
- Personal statement
- Bachelor's degree from an accredited institution (either already complete, or will be complete before you enroll)
- Unofficial transcripts
- Resume/CV
