

Advanced Management Issues in HIV Care

LEARNING OUTCOMES:

- Increase the capacity of physicians, nurses, pharmacists, social workers, and other healthcare professionals to identify, treat, and care for people with HIV.
- Discuss innovative biomedical, behavioral, and systems approaches to end the HIV epidemic.
- Review barriers that minorities face in obtaining HIV care along the care continuum and identify successful approaches to improve their engagement with healthcare providers.
- Describe factors contributing to accelerated aging in HIV and identify strategies to manage common age-related comorbidities.

PRESENTED BY:

- Department of Infectious Disease, Cleveland Clinic
- The Sarah Cole Hirsh Institute for Evidence-Based Practice, Frances Payne Bolton School of Nursing, Case Western Reserve University

IN PARTNERSHIP WITH:

- Case Western Reserve School of Medicine
- Circle Health Services
- The MetroHealth System
