

MASTER OF SCIENCE IN NURSING AT CASE WESTERN RESERVE UNIVERSITY

Nurse-Midwifery

Providing comprehensive women-centered care

About Nurse-Midwifery

Certified nurse-midwives (CNMs) provide a range of care for individuals inclusive of all gender identities and sexual orientations, including pregnancy, childbirth, the postpartum period, and care of the newborn. They practice within a health care system that provides for consultation, collaboration, or referral as indicated by the health status of the client, in accordance with the Standards for the Practice of Midwifery, as defined by the American College of Nurse-Midwives (ACNM).

Clinical Partnerships

Nurse-midwives work individually with clinical instructors to complete clinical experiences in various out-patient and in-patient settings to provide optimal care to women.

During your program, you'll gain experience through:

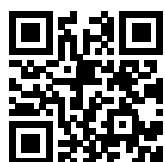

- In-person labor and birth clinical experiences in local hospital systems
- Out-of-state clinical experiences in the final semester

Careers

Our Nurse-Midwifery graduates have gone on to work in a variety of settings and practices. Some examples include Directors of Nurse-Midwifery services and Founders of Birthing Centers.

About Frances Payne Bolton School of Nursing

The Frances Payne Bolton School of Nursing at Case Western Reserve University is a globally recognized leader in nursing education and research. Ranked among the top U.S. nursing schools in NIH-funded research, our focus on nursing leadership and management makes Frances Payne Bolton the world's nursing leadership destination
