

MASTER OF SCIENCE IN NURSING AT CASE WESTERN RESERVE UNIVERSITY

Neonatal Nurse Practitioner (NNP)

Providing urgent, specialized care for premature infants

About Neonatal Nurse Practitioner

As specialists, NNPs focus on the management and care of critically ill infants and their families. The scope of their practice covers birth through two years of age. Their role provides specialized care for the detection of illness, premature birth, at-risk newborns, and facilitating restoration and maintenance of the health of neonates as well as advocacy for quality patient and family care.

Clinical Partnerships

During your program, you'll gain experience, through 950 clinical hours in:

- Level III NICUS working with master's prepared NNP or neonatologist
- Regional NICUS include Rainbow Babies and Children's Hospital, the Cleveland Clinic Foundation Children's Hospital and their affiliates, MetroHealth Medical Center and Akron Children's Hospital

Careers

NNP graduates go on to work in hospital based NICUs across various levels for sick and premature babies, but also in delivery rooms and emergency rooms. Extending their care to outpatient developmental clinics, home health, and even research/educational settings. Providing advanced care from birth through early childhood.
