CWRU School of Medicine Anatomy Camp

[View this email in your browser](#)East Cleveland City Schools
Provost Scholars

Case Western Reserve University School of Medicine Anatomy Camp

Purpose

The goal of this session is to introduce topics concerning the human body regarding health and fitness, covering the functions of the heart, the gastrointestinal system, the skeletal system, and their connection to the biomedical engineering field. This activity aims to spark interest in the Provost Scholars about the variety of professional opportunities in the health sciences.

Presenters

The presenters will be CWRU medical students and graduate students in the biomedical engineering program.

Objectives:

The Provost Scholars will:

- Define the functions of the heart, the bone/skeletons, and the gastrointestinal systems about nutrition and exercise.
- Discuss the anatomy related to these organ systems and applications to the biomedical engineering field.
