About the Presenter: **Danielle ‘Dani’ Sobo**

Dani Sobo is a Survivor Advocate, a faculty member in the Department of Sociology, and a Doctoral Candidate at Case Western Reserve University in Cleveland, Ohio. After receiving her BA in Health Communication from Ohio University (Athens, OH) and completing a Master’s in Public Health, Dani choose to apply my research skills towards a PhD in Medical Sociology. Her academic research focuses on the lived experience of body image & eating disorders over the life course; gender, sex, and sexuality; and the effects of sexual assault & trauma on the mind & body over time. Dani's passions lie in women’s empowerment, and developing sociological models to fight against and to

prevent social injustice.

As the Advocate for Gender Violence Prevention and Response, Dani is responsible for advocating for Case Western Reserve University students who are survivors of gender-based violence (GBV). As the Advocate, Dani is specifically responsible for providing crisis management response and stabilization, therapeutic support, and assistance with navigating options and services on campus and in the community. In addition, Dani collaborates with health care providers; delivers educational programs to raise awareness of sexual violence as a serious public health issue; and, serves as the central point on campus to provide programming on healthy relationships.
