

# Medication for Opioid Use Disorder (MOUD):

## Myths

### MYTHS

- MOUD simply replaces one addiction with another
- MOUD is a one-size-fits-all solution
- MOUD is only suitable for those who are unable to resist temptation
- MOUD is a danger to an individual's recovery journey
- MOUD is a temporary or short-term solution, and it undermines long-term recovery
- MOUD is not real recovery, and people who use MOUD aren't ready or serious about changing
- MOUD is drug-seeking behavior
- Abstinence-based treatment is more effective than MOUD and is always the starting point for anyone seeking help
- People should fail abstinence-based treatments before trying MOUD
- People who buy and sell MOUD without a prescription are using it to get "high"
- MOUD is harmful to a fetus or infant and should not be prescribed to pregnant mothers
- MOUD is not appropriate for adolescents
