

Legacy Week 2019

GREY | BLUE | CWRU

WHAT IS LEGACY WEEK?

Legacy Week was established in 2017, to observe and showcase the history of Case Western Reserve University's momentous history. During this week various departments, offices, student organizations, staff and faculty members, and individual students will host various programs and events to bring to the light the history of CWRU. However, there is more! We know that Case Western Reserve University would be nothing without YOU! So, through programs and events, our campus will help celebrate YOU! Your Legacy! Stop by the many events to learn about your campus and represent your CWRU!

"My CWRU experience provided me with a plan for a successful career in social work. My education has allowed me to leave a legacy that has positively impacted the Cleveland community and to personally change the life of so youth".

Vera-Perkins-Hughes BA,
LSW
(WRC'76)

- Lou Stark
Vice President of Student
Affairs,
Case Western Reserve
University

"As the University's Vice President for Student Affairs since July 2013, I see my legacy as helping others discover their own ongoing impact on our campus and after graduation. Every building, every tree, every stone on our campus likely has some historical significance; just imagine all the stories and tales they hold. This institution offers resources--past and present-- to help all of us embrace our own journey.

When walking among students, I realize I am reminded that others have contributed to my own legacy as well. During my time within higher education, I have had experiences with faculty, staff, and students on their own journey. Each has inspired me to work to improve the world around me.

I also realize that my legacy is always evolving. My legacy is to be a mentor to others, to be open to learning, and to be ready to teach. My legacy is to leave footprints for others to follow. My legacy is to help us think beyond the possible".

"I love the word "legacy." It is a precious inheritance, a road map transmitted across time, a sense of inertia in the right direction. How wonderful that someone can give selflessly to someone who has not even been born yet. We are each and all a part of the CWRU legacy, left for us by generations who are cheering us on from wherever they are."

-Dr. Janice Gerda, Associate Vice President
for Student Affairs,
Case Western Reserve University

Colleen Barker-Williamson, MA,
Dir. of Student Activities & Leadership
Case Western Reserve University

"Legacy Week allows us as a community to celebrate the university's quirky (highly unique) and wonderful history! For almost 30 years I have observed students leaving their legacy here and returning after they graduate so incredibly proud of what they left behind. It has been such an honor to have participated in that process. Enjoy learning more about this wonderfully unique place this week and think carefully about the legacy you would like to leave behind!"

Student President Roundtable (SPR) Welcomes You To Legacy Week!

*enjoy
every
moment.*

Hi everyone!

Thank you so much for joining CWRU to celebrate the legacy of our students, our alumni, and our institution. This week means so much to me. Legacy Week exists because of the work of so many of my friends and mentors who helped shape me into the student leader that I am today, and I am incredibly proud to help maintain their legacy. At CWRU, the typical student is passionate and deeply involved in their field of study, so time spent celebrating is few and far between. I hope that this week will be a well-deserved time to have fun, honor your past contributions and successes, and to build connections and start shaping what the legacy of Case Western Reserve University will be for many years to come.

Wishing you a wonderful week,
Ammar Abidi
Student Presidents' Roundtable Chair

"For me, Legacy Week is especially important as my time at CWRU comes to an end. The week brings up many wonderful memories and moments that we have shared, as well as memories from prior classes as well. Legacy Week is a time to reflect on the legacy we, the current students, are leaving as well as to remember the legacies of those who have come before us and to look forward to the legacies the future classes will share. Shine on forever, Case Western Reserve"

"There is no such thing as a legacy for any one particular student leader. It is the reality of the transient nature of college- in four years or so we will graduate and leave, and four years after that those who knew us and our work will also have left. And yet, we continue. We continue, not to be recognized, but to see how far we can push the tides of change before we pass on the responsibility to the next generation. We continue, not for our own benefit, but to create the seeds whose roots may one day be firmly planted into our collective history. Because there is no such thing as a legacy on this campus without acknowledging what has been built by us. Each student leader is just one thread. Individually, we are prone to fray, but together we create the fabric of something called CWRU.."

- Lucy Wan
Class of 2019

Legacy to me is leaving a lasting impression on those that I am surrounded by here at Case Western – an impression that hopefully has in some way shaped the person that they present to the world when they step off this campus. I want to leave a legacy here that inspires not only the hard work that is a known standard at Case Western but also of empathy for others and a consistent desire to push personal boundaries in becoming a better version of the people we were yesterday. Leaving a legacy requires a deep understanding and appreciation for the past and a strategic and thoughtful focus on how we want to shape the future. The lessons learned, the friendships formed, the struggles overcome, the laughs, the frustrations, the late nights turned into early mornings, the epic failures and the even bigger wins, and the continued push, despite all else, to learn something new every single day all make up my legacy here at Case. If I have changed even one person's outlook on the world or on themselves for the better, my legacy will continue to live. I am grateful that this community gave me the space and the voice to leave one.

Did You Know?

Albert Michelson was the first American scientist to win the Noble prize. He was also a former physics professor. His work with E.W. Morely contributed greatly to the work on light travel. and elemental weight mass.

"I think legacy is a synonym of tradition. Making a presence in the campus community, and embracing the mission of the school. Also, celebrating and commemorating someone's work. Recognizing the work they have done on campus and the community around them. That's a legacy.

"Legacy week is more than learning about the history of a school we go to, but finding out where we came from and how it all started. It is a way to bring everyone together and to continue fostering an environment that our school was build in, as well as learn how to better ourselves to continue the legacy."

You have a legacy. You have and will accomplish so much in this lifetime, and we encourage you to be proud of this journey. In this section, we would like to invite you to write a letter to your future self. Think of your journey. Think of the many people who have influenced you. Take a moment to reflect and write a letter to yourself. Keep going, Spartan!
