

ARE YOU READY FOR HIV PREVENTION?

Steps for PrEP

1

GET INFORMED

Understand that PrEP is used for HIV prevention; it is not a cure.

MAKE AN APPOINTMENT

Visit a prescribing medical professional you are comfortable visiting, such as your Primary Care Provider.

2

3

GET TESTED

It's time to get an STI panel to make sure you are HIV negative.

GET PRESCRIBED

Get your prescription from your PCP if it is a part of the outlined treatment plan, after reviewing the results.

4

5

PICK UP

Pick up your prescription from your pharmacy and follow the listed instructions.

Ask your doctor for any further clarifications.
