Time Management Apps

   
   A task manager that allows users to break down projects into manageable chunks. Things organizes tasks into a checklist — users can set a time limit for when tasks should be completed — so that users don’t forget anything.

   
   Ideal for users who tend to spend a bit too much time on the Internet. RescueTime tracks the amount of time users spend on websites, then provides daily tables and graphs detailing how users have used their time. Users can also set daily goals and block selected websites with this app.

   
   Allows users to connect their Google calendars with their Android phones. CalenGoo also includes a built-in calendar.

4. Remember the Milk ([https://www.rememberthemilk.com/](https://www.rememberthemilk.com/))
   
   Allows users to manage or share tasks from anywhere; can be used in conjunction with Google calendar.

5. focus booster ([http://www.focusboosterapp.com/](http://www.focusboosterapp.com/))
   
   Enhances productivity by helping users visualize their progress (via dashboards, export reports, and timesheets).

   
   Helps users track how much time they spend on different projects.

   A task management system that helps users target what they should be focusing on in order to reach their objectives. MLO automatically generates to-do lists with priority actions.

   Syncs all of a user's calendars in order to provide an overview of the day (i.e. a list of upcoming meetings).

   Allows users to create weekly, monthly, and/or yearly checklists.

    Helps users create goals, manage projects, flag due dates for tasks or assignments.

    Simple time management app based on a stopwatch and timer; splits long tasks into small parts with short breaks and uses a countdown timer to check task progress.

    Helps users manage and share daily to-do lists; syncs across most devices.
