

ABOUT CONVENING

The goal of the **Convening Ideas & Actions: Creating Food Opportunities for the Future** is to develop a vision for our food future with a realistic sense of roadblocks and opportunities. We will use this information to identify solutions that can be tested and applied in the future in areas of Cleveland most burdened by our current food system dynamics.

All are welcome to the table as we discuss and plan for food opportunities for our future. The event is **free** and **open to the public**.
