

Fall 2026

Embedded AI Microgrant

powered by
Sears think[box]

Build AI-powered devices – using sensors, cameras, microphones, etc

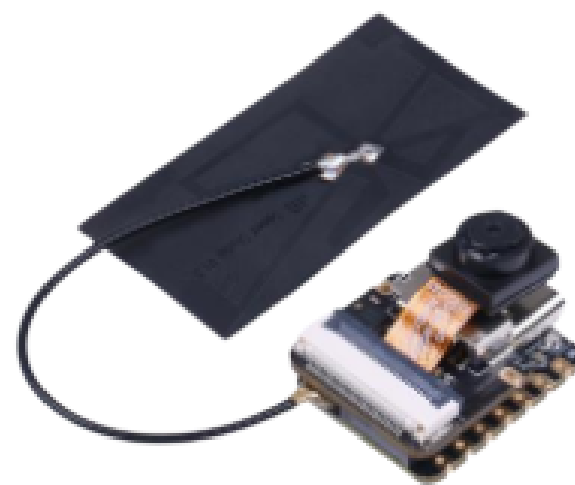

Receive funding & hardware – and keep what you build!

Create a portfolio-ready project – great for resumes and applications

Apply solo or with a small team – open to all undergrad & grad students

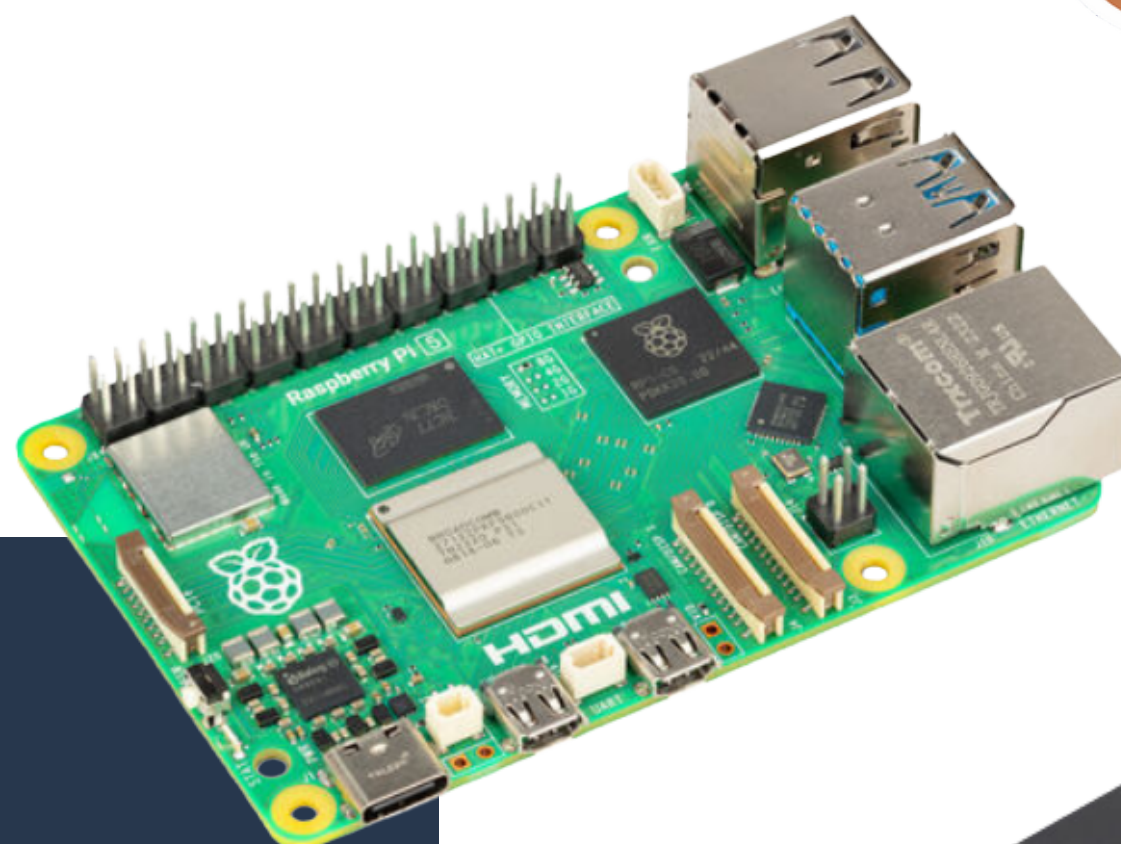

All Project Ideas Welcome

- Smart Sensors
- Wearables
- Robotics
- Assistive Tech
- and more

How It Works:

- Submit your project idea
- Get approved
- Receive your hardware / funding
- Build your prototype
- Submit your final report
- Keep what you build

Interested?
Applications are OPEN

All experience levels welcome
