

Accountancy Innovation Center

Sponsored by KPMG LLP

The Accountancy Innovation Center (AIC) is a new Center in the Weatherhead School of Management. It gives students opportunities to explore how emerging technologies are changing accounting, finance, audit, tax, and business.

The Center is designed to be a hands-on learning environment. You'll get a chance to move beyond simply learning about new technology and have opportunities to experiment with it, build with it, and apply it to real accounting problems. You don't need to be a programmer or have AI experience. AIC activities are designed for students with little or no coding or AI experience. Modern AI and low-code tools make it possible to build solutions using natural language and visual interfaces. We'll use free tools from CWRU to help.

OCTOBER STUDENT SEMINAR

Build Your Personalized AI Daily Briefing

Wednesday, October 14, 2026

3-4 PM, repeating at 6-7 PM | PBL 120

Learn how to build a personalized AI briefing that combines accounting news, sports, weather, RSS feeds, research, and other interests into a daily report.

Get an introduction to AI automations and workflows. **Bring your PC! Register with Gemini Enterprise to take advantage of these tools!**

Scan to register

Space is limited. Registration required.

Sign in with your case.edu account and add your name to the seminar signup.

For more information, see Prof. Mark Barrus in PBL 459 or at mx33@case.edu.
